PROFESSIONAL SUMMARY

Senior SDET with **9+ years** of proven expertise in software testing and automation, delivering high-quality solutions across diverse domains including e-commerce, Salesforce, and financial services. Architected automation frameworks for web, mobile, API, and Salesforce platforms. Delivered **85% test automation coverage**, reduced manual effort by **30+ hours per sprint**, and improved defect detection by **25%** through Selenium, Playwright, and Shift Left practices. Extensive experience testing complex Salesforce applications (Sales Cloud, Service Cloud, CPQ, EUF, CLM Contracts). Expert in Java, Python, CI/CD integration, AI-based test prioritization, and collaborative cross-functional team leadership.

TECHNICAL SKILLS

Languages:Java, Python, TypeScript

Automation Frameworks:Selenium WebDriver, Playwright, Appium, Cucumber BDD, TestNG, JUnit

API Testing:Rest Assured, Python Requests, Postman

Salesforce:Sales Cloud, Service Cloud, CPQ, EUF, CLM Contracts, DataSync

Test Management:Jira, qTest, Azure DevOps (ADO), Mantis, VersionOne

CI/CD & DevOps:Azure DevOps Pipelines, GitHub Actions, GitHub Copilot

Testing Types:Smoke, Regression, System, Functional, UAT, Localization, Compatibility, API, Mobile

Development Tools:IntelliJ IDEA, Visual Studio, PyCharm, Eclipse, Git

PROFESSIONAL EXPERIENCE

Sr. SDET

Feb 2023 – Feb 2026

Unify Technologies Pvt Ltd (Client: Conga - The Revenue Company)

Java, Selenium, Playwright, Rest Assured, Salesforce

- Automated **85%** of Salesforce regression and smoke test cases using Selenium and Playwright, reducing manual effort by **30+ hours per sprint**
- Increased test coverage across CPQ, CLM, and EUF modules from **60% to 90%** via hybrid automation frameworks
- Reduced production defects by **25%** through rigorous PR reviews, code quality enforcement, and peer mentoring
- Architected comprehensive API automation suites with Rest Assured, achieving **99% defect-free** release delivery
- Implemented Shift Left testing practices, integrating automation into CI/CD pipelines for early defect detection and cost reduction
- Performed defect analysis, retesting, and closure activities to maintain release stability and quality gates
- Supported sprint releases and post-deployment validation, ensuring seamless production deployments
- Implemented compatibility testing across multiple platforms, browsers, and devices
- Leveraged GitHub Copilot to accelerate test script development, enhance code quality, and reduce repetitive manual tasks

Test Specialist

July 2020 – Oct 2022

Birlasoft Ltd (Client: S&P Global - Crisil)

Java, Python, Selenium, Rest Assured, Azure DevOps

- Scaled automation coverage from **60% to 90%** by developing robust Selenium and Python-based test frameworks
- Built integrated API automation with Rest Assured and Python Requests, eliminating manual API validation efforts

- Managed test solutions and stakeholder feedback using Azure DevOps, improving collaboration and release velocity
- Performed comprehensive functional, regression, UAT, and smoke testing across multiple distributed backend systems
- Enhanced automation frameworks through continuous R&D activities, improving efficiency and maintainability
- Collaborated with cross-functional teams to align test strategies and accelerate release cycles

QA Engineer

Nov 2017 – May 2020

Nisum Consulting Pvt Ltd (Client: Macy's and Bloomingdale's)

Java, Python, Selenium, Appium, Cucumber BDD, Rest Assured

- Developed scalable automation frameworks using Selenium WebDriver, Appium, and Cucumber BDD in Java for e-commerce platforms
- Authored comprehensive feature files and implemented step definitions for BDD-driven testing approach
- Conducted thorough regression testing for new features and updates across multiple product lines
- Customized Jira workflows for scheduling, tracking, and reporting test activities, improving team visibility
- Collaborated with QA and Development teams to resolve defects faster and enhance overall product stability
- Executed test cases for projects including Controlling Credit Finance Plan, Star Rewards, Mobile CX Enhancements, B-money, Non-Transactional Offers, and My Wallet

Test Engineer

Nov 2016 – Oct 2017

Falconnect Technologies Pvt Ltd (Client: Chola Mandalam, Chennai)

Java, Selenium, Appium, Mantis

- Automated mobile and web applications using Selenium and Appium for Dealer Plus platform
- Executed test cases across multiple browsers and platforms ensuring comprehensive coverage
- Reported and tracked defects using Mantis, generating test summary reports for management review
- Performed functional, regression, GUI, and user acceptance testing throughout the SDLC

KEY PROJECTS

Salesforce CPQ & EUF Automation

Java, Selenium, Playwright, Rest Assured, Salesforce

- Built end-to-end automation for CPQ (Configure Price Quote), CLM (Contract Lifecycle Management), and EUF (End User Forms) modules
- Achieved **90% test coverage** and delivered **30+ hours sprint savings** through comprehensive automation
- Implemented hybrid framework supporting both UI and API testing for Salesforce ecosystem

E-Commerce Test Platform

Java, Python, Selenium, Appium, Cucumber BDD, Rest Assured

- Architected hybrid BDD framework for Macy's and Bloomingdale's e-commerce platforms
- Enabled parallel execution across web and mobile channels, reducing test execution time significantly
- Integrated API testing layer for backend validation alongside UI automation

Subscription Approval - RAP Admin

Java, Python, Selenium, Azure DevOps

- Developed automation framework for S&P Global's subscription approval system
- Integrated with Azure DevOps for continuous testing and automated reporting

EDUCATION

Bachelor of Technology (B.Tech) — TECA-JNTUK

2012
