

Education

- **Bachelor of Technology (B.Tech)**
TECA-JNTUK, 2012
- **Intermediate**
Sri Prakash Junior College, 2008
- **SSC**
Viveka Vardhani Public School, 2006

Technical Skills

- **Automation Tools:**
Selenium, Playwright, Appium, Cucumber (BDD), TestNG
- **Programming Languages:**
Java, Python, TypeScript
- **API Testing:** Rest Assured, Python Requests
- **Test Management:** Jira, qTest, Azure DevOps, Mantis, VersionOne
- **CI/CD:** Azure DevOps Pipelines, GitHub
- **Other Tools:** IntelliJ, Visual Studio, PyCharm, MS Office

PROFILE INFO

Senior SDET with 10+ years of experience in automation testing across **web, mobile, API, and Salesforce platforms**. Skilled in designing **Selenium and Playwright frameworks**, with strong proficiency in **Java, Python, TestNG, and Cucumber BDD**. Extensive expertise in **Salesforce testing (Sales Cloud, Service Cloud, CPQ, EUF, CLM Contracts)**. Known for adopting **Shift Left practices** and **AI-based test prioritization** to optimize execution speed, enhance coverage, and reduce cost of quality.

PROFESSIONAL SUMMARY

- **Over 10 years of proven expertise in Software Testing and Automation**, delivering high-quality solutions across diverse domains.
- **Designed and executed Web and Mobile Automation frameworks** using Selenium, Playwright, and Appium to accelerate release cycles.
- Extensive experience testing complex **e-commerce and Salesforce (Sales Cloud, Service Cloud, CPQ, EUF, CLM Contracts, DataSync applications)**, ensuring performance, scalability, and reliability.
- **Strong programming proficiency in Java and Python**, with hands-on experience in building scalable test frameworks using TestNG.
- **Comprehensive testing expertise across Smoke, Regression, System, and Localization testing**, ensuring end-to-end product validation.
- **Developed and maintained API automation suites** using Rest Assured and Python Requests, improving coverage and reducing manual effort.
- **Skilled in defect tracking and test management tools** including qTest, JIRA, Azure DevOps (ADO), Mantis, and VersionOne, ensuring streamlined collaboration and reporting.
- **Extensive experience testing complex e-commerce and logistics applications**, focusing on performance, scalability, and reliability.
- Leveraged **GitHub Copilot** to accelerate test script development, enhance code quality, and reduce repetitive manual tasks.
- **Adopted Shift Left testing practices**, integrating early test design and automation into the SDLC to detect defects sooner and reduce overall cost of quality.
- **Collaborative team player with strong communication and problem-solving skills**, fostering cross-functional alignment.
- **Quick learner, adaptable, and committed to continuous improvement**, consistently driving innovation in testing methodologies.

WORK EXPERIENCE

Sr. SDET

Unify Technologies Pvt Ltd (Client: Conga) | Feb 2023 – Feb 2026

Project Name : Propose & Quote (CPQ) and EUF
Client : Conga-The Revenue Company
Platform : Java, Selenium, Playwright, Rest Assured.

- **Automated 85% of Salesforce regression and Smoke test cases**, reducing manual effort by 30+ hours per sprint.
- **Increased test coverage across CPQ, CLM and EUF from 60% to 90%** using hybrid automation frameworks.
- Conducted PR reviews and merged automation scripts, improving code quality and reducing defects by **25%**.
- Performed defect analysis, retesting, and closure to maintain release stability.
- Supported sprint releases and post-deployment validation, ensuring 99% defect-free delivery.
- Implemented compatibility testing across multiple platforms and devices.

Test Specialist

Birlasoft Ltd (Client: S&P Global) | July 2020 – Oct 2022

Project Name : Subscription Approval-RAP Admin
Client : S&P Global-Crisil
Platform : Java, Python, Selenium, Rest Assured

- Automated web applications with **Selenium and Python**, increasing automation coverage from **60% to 90%**.
- Managed test solutions and stakeholder feedback using Azure DevOps.
- Performed functional, regression, UAT, and smoke testing across multiple back-end systems.
- Enhanced frameworks through R&D activities, improving automation efficiency.
- Integrated API automation with Rest Assured & Python Requests.
- Collaborated with cross-functional teams to align test strategies & accelerate releases.

QA Engineer

Nisum Consulting Pvt Ltd | Nov 2017 – May 2020

Project Names : Controlling Credit finance Plan
Star Rewards
Mobile CX enhancements & B-money
Non-Transactional Offers
My Wallet
Client : Macys and Bloomingdales
Platform : Java, Python, Selenium, Appium, Cucumber BDD & Rest Assured

- Automated functional tests using **Selenium WebDriver and Cucumber BDD**.
- Authored feature files and implemented scripts in Java.
- Conducted regression testing for new features and updates.
- Customized Jira for scheduling, tracking, and reporting test activities.
- Collaborated with QA & Dev teams to resolve defects faster and enhance product stability.

Test Engineer

Falconnect Technologies Pvt Ltd | Nov 2016 – Oct 2017

Project Name : Dealer plus Application (Mobile & Web)
Client : Chola Mandalam (Chennai)
Platform : Java, Selenium, Appium

- Automated mobile and web applications using Selenium and Appium.
- Executed test cases across multiple browsers and platforms.
- Reported defects using Mantis and generated test summary reports for management.
- Performed functional, regression, GUI, and user acceptance testing.
